### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

Paper No(s)/Mail Date. \_\_\_\_\_.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_\_.

## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 4-12 and 15-19 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3, 13, 14 and 20 rejected under 35 U.S.C. 103(a) as being unpatentable over Koike et al. (5,796,458) in view of Terada et al. (6,122,031).

Regarding Claims 1-3, 13, 14 and 20, Koike et al. disclose an element division liquid crystal display device and its manufacturing method where in Fig. 36, alignment layers 51 are in contact with electrodes 21 and 24 with liquid crystal layer 20 is between the upper alignment layer and electrode and the lower alignment layer and electrode. As show in the figure, a potential difference occurs between the upper alignment layer/electrode and the lower alignment layer/electrode. Koike et al. fail to disclose the required specification of the offset potential of the liquid crystal display device. However, Terada et al. disclose a liquid crystal display device and liquid crystal apparatus including same where in column 2, lines 25-60, the designed/specified offset potential in the liquid crystal display device is disclosed.

Art Unit: 2826

It would have been obvious to one of having ordinary skill in the art at the time the invention was made to include the required specification/design of the offset potential in Koike et al. as taught by Terada et al. in order to have a liquid crystal display device with higher performance.
